**Status:** Concept Design

### Partners:

University City District (UCD )

### Baltimore Avenue Streetscape...

University City District (UCD) has planned streetscape improvements for Baltimore Avenue between 45th and 50th Street, including lighting improvements and corridor greening. The Office of Watersheds is working with UCD to design streetside stormwater planters that will capture runoff from the contributing street and sidewalk areas.

### Benefits:

- Reduce stormwater runoff through infiltration and evapotranspiration
- Neighborhood beautification
- Provide an example Green Street for Philadelphia

Clean Water.....
