Lower Merion Conservancy
Pennsylvania Environmental Council

Partnership for the Darby-Cobbs Watershed...

In 1999 the City of Philadelphia Water Department's Office of Watersheds initiated its first watershed-based partnership. The Partnership was initiated in order to work across municipal and county boundaries in order to plan for water quality and quantity improvements on a watershed basis. In 2004, the Darby-Cobbs Watershed Partnership completed development of the Cobbs Creek Integrated Watershed Management Plan (CCIWMP) -- now available at www.phillyriverinfo.org.

Benefits:

The Darby-Cobbs Watershed Partnership have worked together since 1999 to develop strategies for improvement of water quality and quantity within the Cobbs Creek Watershed. This partnership has successfully developed:

- several educational workshops regarding stormwater management,
- Watershed Video featuring events and points of interest from the headwaters to the confluence with the Delaware
- Maps and Informational Brochures

Clean Water.....
