

## 1 Introduction

### 1.1 Background

- 1.1.1 Stormwater Ordinance and Regulations
- 1.1.2 The Changing Regulatory Environment

### 1.2 Organization

### 1.3 How to Use this Manual

## 2 Applicability

### 2.0 Introduction

### 2.1 Earth Disturbance

### 2.2 Determining Applicability

- 2.2.1 Conceptual Review
- 2.2.2 Erosion and Sediment Control
- 2.2.3 Watershed Specific Requirements
- 2.2.4 Stormwater Management Requirements
- 2.2.5 Public Health and Safety Rates

### 2.3 The Development Review Process

## 3 Site Planning

### 3.0 Introduction

### 3.1 Site Inventory - Existing Resources and Site Analysis

### 3.2 Philadelphia Water Department Conceptual Review

### 3.3 Site Plan Preparation

## 4 Integrated Site Design

### 4.0 Introduction

### 4.1 Protect and Utilize Existing Site Features

- 4.1.1 Protect Sensitive/Special Value Features
- 4.1.2 Cluster and Concentrate
- 4.1.3 Minimize Impacts of Disturbance

### 4.2 Reduce Impervious Cover to be Managed

- 4.2.1 Green Project Review

- 4.2.2 Minimize Area of Impervious Cover
- 4.2.3 Disconnect Impervious Cover
- 4.2.4 Maximize Tree Canopy over Impervious Cover
- 4.2.5 Install Green Rooftops to Reduce Directly Connected Impervious Area
- 4.2.6 Install Porous Pavement to Reduce Directly Connected Impervious Area

## 4.3 Manage Remaining Stormwater

- 4.3.1 Estimate Level of Control Needed
- 4.3.2 Design Stormwater Management Practices Using a Systems Approach

## 4.4 Consider Operations and Maintenance in Design

- 4.4.1 Designing to Minimize Maintenance
- 4.4.2 Provide Access
- 4.4.3 Post-Construction Ownership
- 4.4.4 Maintenance Tasks and Schedule

# 5 Post Construction Stormwater Management Plans

## 5.0 Introduction

## 5.1 Erosion and Sediment Pollution Control Plan

## 5.2 Components of the Post Construction Stormwater Management Plan

- 5.2.1 The Standard Submittal Format
- 5.2.2 Proof of Application for Applicable Permits
- 5.2.3 Documentation of Special Circumstances

## 5.3 Acceptable Methods for Calculations

- 5.3.1 Design Storms
- 5.3.2 Runoff Estimation
- 5.3.3 Storage Volume Estimation
- 5.3.4 Flow Routing
- 5.3.5 Storm Sewer Design

## 5.4 Post Construction Stormwater Management Plan Submittal Process

- 5.4.1 Project Screening
- 5.4.2 Technical Review Process
- 5.4.3 Inspections

# 6 Utilizing Existing Site Features

## 6.0 Introduction

## 6.1 Street Design

## 6.2 Parking Lot Design

6.3 Planter Boxes

6.4 Special Detention Areas (see PA Stormwater BMP Manual)

6.5 Disconnecting Impervious Cover

## 7 Stormwater Management Practices Design Guidelines

7.1 Green Roofs

7.2 Rain Barrels and Cisterns

7.3 Filter Strips

7.4 Filters

7.5 Bioinfiltration / Bioretention

7.6 Detention Basins

7.7 Berms and Retentive Grading

7.8 Swales

7.9 Constructed Wetlands (see PA Stormwater BMP Manual)

7.10 Ponds & Wet Basins (see PA Stormwater BMP Manual)

7.11 Subsurface Vaults

7.12 Subsurface Infiltration

7.13 Porous Pavement

7.14 Pre-fabricated and Proprietary Designs (see PA Stormwater BMP Manual)

7.15 Inlet and Outlet Controls

## 8 Landscape Guidance

8.0 Introduction

8.1 Planting Recommendations / Guidelines

8.2 Facility Specific Landscaping Guidance

8.3 Native and Recommended Non-invasive Plants

8.4 Prohibited Non-native and Invasive Plants

## Appendices

- A. Hotspot Investigation Procedures
- B. Soil Infiltration Testing Procedures
- C. Geotechnical Investigation (Subsurface Stability) Procedures
- D. Maps: Zones for Acceptable Practices
- E. Worksheets and Checklists
- F. Regulatory Guidance
  - F.1 The Philadelphia Stormwater Management Regulations
  - F.2 Local Permitting Requirements
  - F.3 Federal and State Permitting Requirements
  - F.4 Special Circumstances and Waiver Requests
  - F.5 PWD Review Policies
- G. Case Studies
- H. Abbreviations & Acronyms
- I. Glossary
- J. References
- K. Voluntary Small Sites Checklist
- L. Homeowner's Guide to Stormwater Management

## List of Figures

- Figure 1.1: Using the Manual
- Figure 4.1: Rooftop disconnection  
 Figure 4.2: Systems approach to SMP design  
 Figure 4.3: Alternative designs for storing runoff
- Figure 6.1: Traffic calming device  
 Figure 6.2: Secondary street with bioretention basins  
 Figure 6.3: Cul-de-sac with bioretention  
 Figure 6.4: Cross-section view of bioretention cul-de-sac  
 Figure 6.5: Cross-section view of secondary street with bioretention basin  
 Figure 6.6: Flow-through planter box  
 Figure 6.7: Rooftop disconnection  
 Figure 6.8: Gravel filter strip
- Figure 7.1: Cross-section view of intensive roof garden  
 Figure 7.2: Subsurface storage and reuse  
 Figure 7.3: Rain water reuse  
 Figure 7.4: Components of a rain barrel  
 Figure 7.5: Diagram of a rain barrel and irrigation house watering garden  
 Figure 7.6: Underground cistern design schematic  
 Figure 7.7: Runoff cistern  
 Figure 7.8: Filter strip in forested area  
 Figure 7.9: Filter strip with gravel trench level spreader  
 Figure 7.10: Filter strip with curb opening  
 Figure 7.11: Suggested design specifications for narrow pretreatment filter strips  
 Figure 7.12: Filter with infiltration  
 Figure 7.13: Sand filter with underdrain  
 Figure 7.14: Surface sand filter  
 Figure 7.15: Typical schematic of perimeter filter design  
 Figure 7.16: Large subsurface filter  
 Figure 7.17: Profile of flow-through planter box  
 Figure 7.18: Tree pit bioretention  
 Figure 7.19: Example of a bioretention system with varied plant materials  
 Figure 7.20: Extended detention basin schematic  
 Figure 7.21: Berm cross-section  
 Figure 7.22: Example of retentive grading  
 Figure 7.23: Woodland infiltration berms in series  
 Figure 7.24: Ideal substrate components of a berm  
 Figure 7.25: Recommended berm shape  
 Figure 7.26: Schematic of subsurface wet vault  
 Figure 7.27: Direct connection of a roof into a subsurface infiltration bed  
 Figure 7.28: Intermediate sump box and dry well  
 Figure 7.29: Flow splitting device  
 Figure 7.30: Schematic of a flow splitter (1 of 2)

# Table of Contents

- Figure 7.31: Schematic of a flow splitter (2 of 2)
- Figure 7.32: Cross-section of rock-lined channel
- Figure 7.33: Filter strip with gravel trench level spreader
- Figure 7.34: Riprap apron
- Figure 7.35: Details of riprap outlet basin
- Figure 7.36: Schematic of baffled outlet
- Figure 7.37: Orifice definitions and perforated riser
- Figure 7.38: Reverse slope pipe outlet
- Figure 7.39: Hooded outlet orifice protection
- Figure 7.40: Internal control for orifice protection
- Figure 7.41: Trash racks
- Figure 7.42: Sand filter with underdrain implemented
- Figure 7.43: Typical permeable wear section
  
- Figure 8.1: Cross-section of root zone
